The Construction Science Expo career awareness event is held annually in May and October and has reached over 10,000 youth in Southeast Detroit since 2011 and Lansing since 2023. Our coalition of 60+ construction employers, associations, professional trade union training centers, colleges, and Black Caucus Foundation/Navigation to Success Program strive to bring hands-on experiences showcasing **Engineering and Skilled Trades** together to inspire young people to learn about our industry. We are looking for participants and sponsors for our youth event. Together we can establish a view of Construction that emphasizes safety and success and INSPIRES YOUTH to work in our industry!

This event is invitation only. Guest attendance may be registered in advance for media, businesses and schools district representatives through our website.
